\* Actual pressure rating will be determined by the valve configuration, body material, seat material and other factors.

**⚠ WARNING – USER RESPONSIBILITY**

**FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.**

This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

**Offer of Sale**

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the detailed "Offer of Sale" elsewhere in this document or available at [www.parker.com/ipdus](http://www.parker.com/ipdus).

# V Series Needle Valves

## Introduction

Parker V Series Needle Valves are designed for positive leak tight shut-off and regulation of fluids in process, power, and instrumentation applications. With a wide variety of port sizes and styles, temperature capabilities ranging from -65°F to 450°F (-54°C to 232°C) and pressures to 5000 psig (345 bar), V Series Needle Valves provide the user with the utmost in flexibility when designing miniaturized tubing or piping systems.

## Features

- ▶ Choice of three stem types:
  - R-Stem – All metal, blunt stem tip
  - N-Stem – All metal, tapered needle stem tip
  - K-Stem – PCTFE stem tip
- ▶ Differential hardness between the strain hardened stem and cold formed body threads provides improved cycle life
- ▶ Choice of PTFE packing or elastomeric O-ring stem seals
- ▶ 316 Stainless Steel, Steel, Brass and Monel® Alloy 400 construction
- ▶ Inline and angle patterns
- ▶ Wide variety of US Customary and SI ports
- ▶ Panel mountable
- ▶ 100% factory tested
- ▶ Optional color coded handles

## Specifications

### Pressure Ratings:

316 Stainless Steel: 5000 psig (345 bar) CWP

Brass, Steel and Monel® Alloy 400:

3000 psig (207 bar) CWP

**Orifice:** 0.078" to 0.312" (2.0mm to 7.9mm)

**C<sub>v</sub>:** 0.12 to 1.90

**Port size:** 1/8" to 3/4" (3mm to 12mm)

### Temperature Ratings:

Stainless Steel and Monel® Alloy 400:

-65°F to 450°F (-54°C to 232°C)

Brass: -65°F to 400°F (-54°C to 204°C)

Steel: -20°F to 350°F (-29°C to 177°C)

PTFE Packing:

-65°F to 450°F (-54°C to 232°C)

PCTFE Stem Tip:

-65°F to 350°F (-54°C to 177°C)

Nitrile Rubber Stem Seal:

-30°F to 250°F (-34°C to 121°C)

Fluorocarbon Rubber Stem Seal:

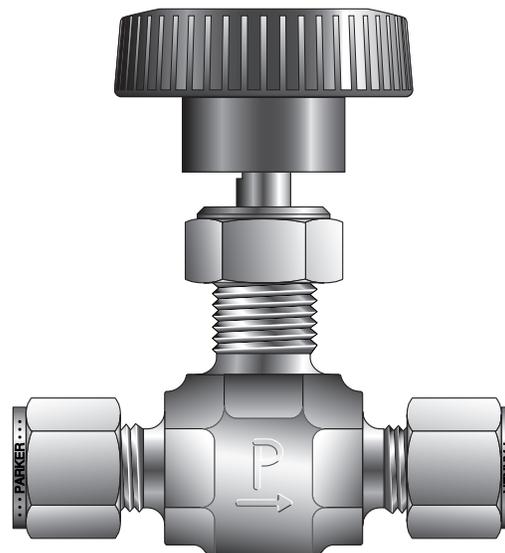

-15°F to 400°F (-26°C to 204°C)

Ethylene Propylene Rubber Stem Seal:

-70°F to 275°F (-57°C to 135°C)

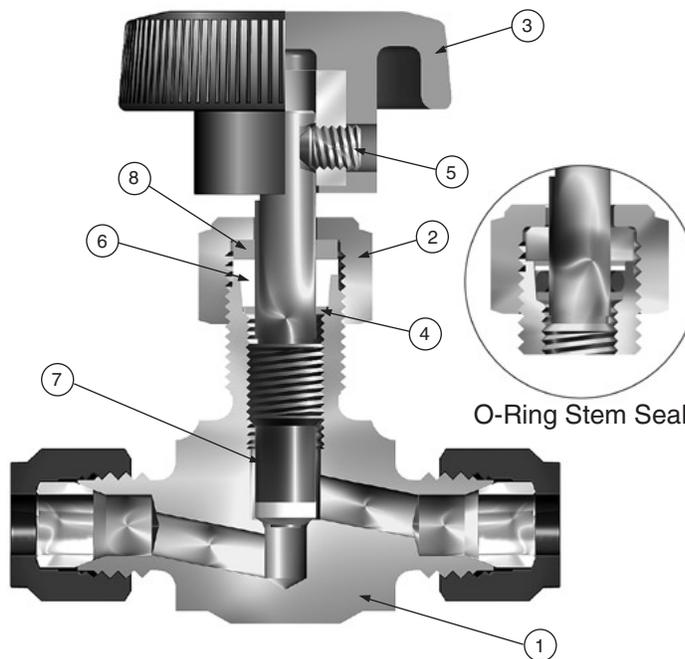

**Note:** When combining body, seat and seal materials, the most restrictive temperature rating becomes the limiting factor on temperature range.

Monel® Alloy 400 is the registered trademark of Special Metals Corporation.

Model Shown: 4Z-V4LK-SS

## Materials of Construction (with PTFE Packing)

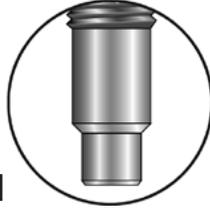

Model Shown: 4Z-V4LK-SS

## Stem Types

**K**  
PCTFE tipped

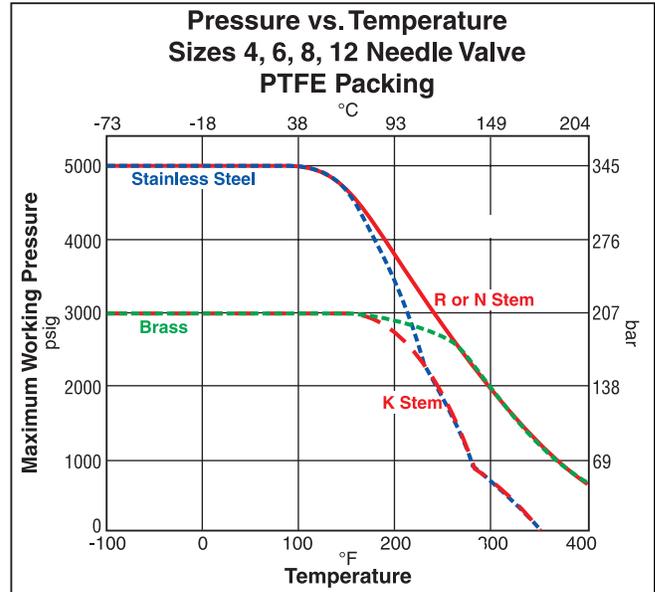

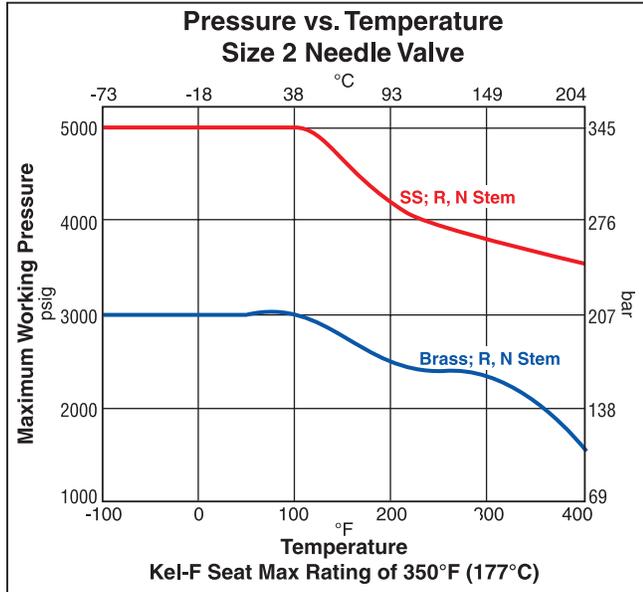

**N**  
Needle (2-1/2°)

**R**  
Blunt (30°)

## Pressure vs. Temperature

Note: To determine MPa, multiply bar by 0.1

## Materials of Construction (with PTFE Packing)

\* Handles for V8 and V12 Series Valves with R and N Stems are aluminum T-bars.

\*\* Optional O-ring elastomeric stem seals are available – See How to Order.

\*\*\* Panel Nut is nickel plated brass on V2 Series Valves. Panel Nuts must be ordered separately – see page 10.  
Lubrication: Perfluorinated Polyether

## How to Order

Dimensions in inches/millimeters are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

Example 1, below, describes an angle pattern V4 Series needle valve equipped with 1/4" CPI™ compression inlet and outlet ports, a PCTFE tipped stem, Nitrile seals, and stainless steel construction.

Example 2, below, describes an inline pattern V6 Series needle valve equipped with 1/4" male NPT inlet port, 1/4" female NPT outlet port, a needle stem type, PTFE stem seal, brass construction.

**Example 1: 4Z-V4AK-BN-SS** (shown in the part number blocks below)

**Example 2: 4M4F-V6LN-B**

Inlet Port*		Outlet Port*		Valve Series	Stem Type	Stem Seal	Body Material
2A	2M	4A		V2	R Blunt (30°)	Blank PTFE	SS Stainless Steel
2F	2Z	4Z			N Needle (2-1/2°)	BN Nitrile Rubber	S Steel
2A	4A	6A	M6A	V4	K PCTFE	EPR Ethylene Propylene Rubber	M Monel® Alloy 400
2F	4M	6Z	M6Z			V Fluorocarbon Rubber	B Brass
2M	4W	M3A	M8A				
2Z	4Z	M3Z	M8Z				
4A	6A	8A	M10A	V6			
4F	6M	8Z	M10Z				
4M	6W	M8A	M12A				
4Z	6Z	M8Z	M12Z				
4F	6Z	8Z	M12A	V8			
6A	8A	M10A	M12Z				
6F	8M	M10Z					
8F	10A	12A		V12			
8W	10Z	12Z					

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## How to Order Options

**Colored Round Handles** – Add the designator corresponding to the correct handle color as a suffix to the part number. Black is standard, **W** - white, **B** - blue, **G** - green, **R** - red, **Y** - yellow. **Example:** M10A-V6LK-SS-**G**

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive valves cleaned and assembled for oxygen service in accordance with Parker Specification ES8003. **Example:** 4A-V4AN-EPR-SS-**C3**

# V Series Needle Valves

---

## How to Order Components

**Colored Round Nylon Handles with Handle Screw** – Valve Series-Handle-Color. **Example: V4-HANDLE-BLUE**

**Stainless Steel T-Bar Handles with Handle Screw** – **Examples:** V2: V2-BAR-HANDLE-SS; V4: V4-BAR-HANDLE-SS; V6: V6-BAR-HANDLE-SS; V8: U12-BAR-HANDLE-SS; V12: U12-BAR-HANDLE-SS

**Aluminum T-Bar Handles with Handle Screw** – **Examples:** V2: Not available; V4: V4-BAR-HANDLE-AL; V6: V4-BAR-HANDLE-AL; V8: U12-BAR-HANDLE-AL; V12: U12-BAR-HANDLE-AL

**Panel Mounting Nuts** – **Examples:** V2: 2-Panel-Nut-SS; V4: 4-Panel-Nut-SS; V6: 6-Panel-Nut-SS; V8: 8-Panel-Nut-SS

## How to Order Maintenance Kits

**PTFE Packing Stem Kits** – Consists of One Stem; One PTFE Packing; One Upper Packing Washer; One Lower Packing Washer; One Packing Nut; Maintenance Instructions.

Kit-Valve Series and StemType-Body Material. **Examples: KIT-V4K-SS; KIT-V6N-B**

**Fluorocarbon Rubber Packing Stem Kits** – Consists of One Stem; One Fluorocarbon Rubber O-ring Seal; One O-ring Back-up Gland; One O-ring Gland; One Lower Packing Washer; One Packing Nut; Maintenance Instructions.

Kit-Valve Series and Stem Type-V-Body Material. **Examples: KIT-V2R-V-B; KIT-V4K-V-SS**

**Nitrile Rubber Packing Stem Kits** – Consists of One Stem; One Nitrile Rubber O-ring Seal; One O-ring Back-up Gland; One O-ring Gland; One Lower Packing Washer; One Packing Nut; Maintenance Instructions.

Kit-Valve Series and Stem Type-BN-Body Material. **Examples: KIT-V2R-BN-B; KIT-V4K-BN-SS**

**Ethylene Propylene Rubber Packing Stem Kits** – Consists of One Stem; One Ethylene Propylene Rubber O-ring Seal; One O-ring Back-up Gland; One O-ring Gland; One Lower Packing Washer; One Packing Nut; Maintenance Instructions.

Kit-Valve Series and Stem Type-EPR-Body Material. **Examples: KIT-V2R-EPR-B; KIT-V4K-EPR-SS**

# U Series Needle Valves

## Introduction

Parker U Series Union Bonnet Valves have been engineered for use at pressures up to 6,000 (414 bar) and temperatures as high as 1,200°F (649°C). A non-rotating lower stem helps to extend packing life by removing rotation from the packing area. Stem packing below the threads isolates the thread lubricant from the flow, ensuring adequate lubrication regardless of the media.

## Features

- ▶ Union bonnet design ensures high integrity seal under severe service applications
- ▶ Packing below the power threads protects thread lubricants from media and isolates the lubricants from the media
- ▶ Dust seal in the packing nut protects stem threads from external contamination
- ▶ Stem swivel above the packing eliminates entrapment area and increases packing life
- ▶ Choice of Grafoil® or PTFE packing
- ▶ Choice of Regulating or Blunt stem types. Blunt stem type helps combat wire draw which may occur when two phase flow is present (i.e. steam service)
- ▶ 316 stainless steel construction
- ▶ Wide variety of US Customary and SI ports
- ▶ Panel mountable
- ▶ 100% factory tested

## Materials of Construction

Item #	Description	Material
*1	Body	ASTM A 182, Type F316
2	Bonnet Nut	ASTM A 479, Type 316
*3	Bonnet	ASTM A 479, Type 316
*4	Lower Stem*	ASTM A 564, Type 630
5	Upper Stem	ASTM A 564, Type 630
6	Stem Guide	ASTM A 581, Type 416
7	Ball	440-C Stainless Steel
*8	Bonnet Seal**	Nickel-Chromium-Iron Alloy
9	Packing Nut	ASTM A 479, Type 316
*10	Packing***	Grafoil®
*11	Packing Washer	316 Stainless Steel
12	Handle****	Aluminum
13	Handle Screw	316 Stainless Steel
14	Dust Seal*****	Nylon 6/6
15	Locking Nut	Stainless Steel

\* Wetted parts

\* Lower Stem material is ASTM A 276 Type 316 with HT option

\*\* Not required on U6 and U12 Series which have metal-to-metal seals

\*\*\* Optional PTFE Packing is available

\*\*\*\* Handle material is stainless steel with HT option

\*\*\*\*\* Dust Seal not available with HT option

Lubrication: Molybdenum disulfide with soft metallic fillers

## Specifications

### Pressure Rating:

6000 psig (414 bar) CWP

### Temperature Rating:

PTFE packing:

-65°F to 450°F (-54°C to 232°C)

Grafoil® packing:

-65°F to 700°F (-54°C to 371°C)

Grafoil® packing with HT option:

-65°F to 1200°F (-54°C to 649°C)

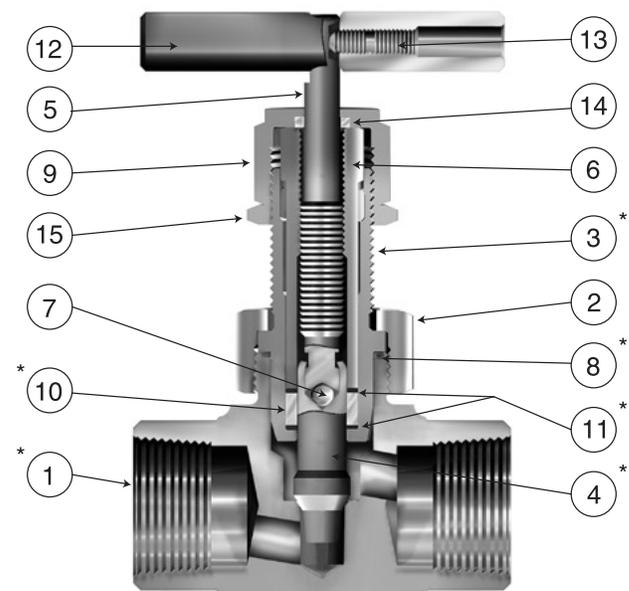

**Orifice:** .177" to .437" (4.5mm to 11.1mm)

**Cv:** .53 to 3.55

### Pressure Rating and Tubing Selection:

For working pressures of A-LOK® and CPI™ tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Products Master Binder, or the Parker Instrument Tube Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

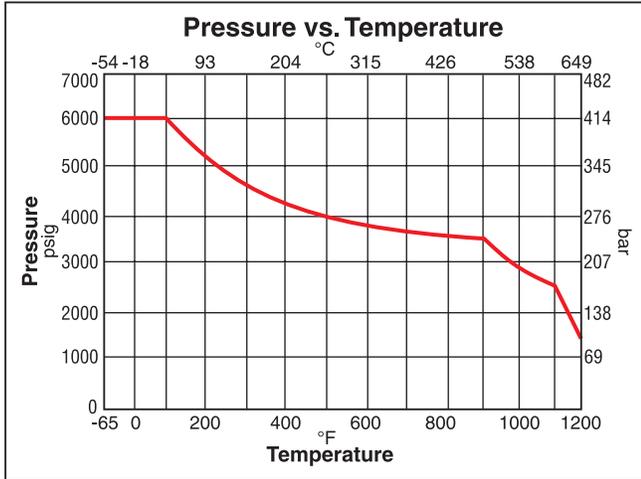

**Model Shown: 16F-U16LR-G-SS**

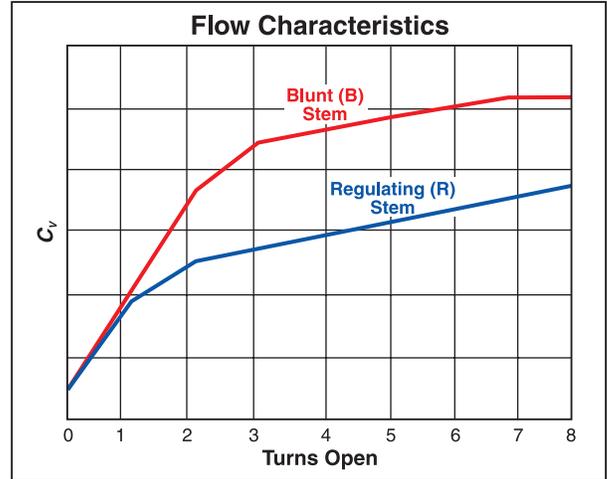

Grafoil® is a registered trademark GrafTech International Holdings, Inc.

# U Series Needle Valves

## How to Order

Dimensions in inches/millimeters are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes an angle pattern U6 Series needle valve equipped with 1/4" CPI™ compression inlet and outlet ports, a regulating stem type, Grafoil® packing, stainless steel construction.

### Example 1: 4Z-U6AR-G-SS

4Z		-		U6A		R		-		G		-		SS		
Inlet Port*		Outlet Port*		Valve Series		Stem Type		Packing		Body Material						
Inlet Port*		Outlet Port*		Valve Series		Stem Type		Packing		Body Material						
2F	4F	4W	M6A	M8	U6A	B	Blunt	T	PTFE	SS	Stainless Steel					
4A	4M	4Z	M6Z	M8Z	U6L	R	Regulating	G	Grafoil®							
4A	6W	8W	12A	M12A	U12A											
4F	6Z	8Z	12Z	M12Z	U12L											
4Z	8A	10A	M10A	M14A												
6A	8F	10Z	M10Z	M14Z												
6F																
8A	8W	12PSW	16M	M20Z	U16A											
8F	8Z	12W	16Z	M25A	U16L											
8M	12F	12Z	M12Z	M25Z												
8PSW	12M	16F	M20A													

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## How to Order Options

**High Temperature** – Add the suffix **-HT** to the end of the part number to receive valves with a 316 stainless steel lower stem and stainless steel handle. **Example:** 4M-U6LB-G-SS-**HT**

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive valves cleaned and assembled for oxygen service in accordance with Parker Specification ES8003. **Example:** 8A-U12LR-T-SS-**C3**

**Stainless Steel Bar Handle** – To obtain valves with stainless steel bar handle, add the suffix **-ST** to the end of the part number. **Example:** 12Z-U16AB-T-SS-**ST**

**ASME B31.1 Compliant Valves** – Add the suffix **-QC311**. **Example:** 8F-U12LR-G-SS-**QC311**

## How to Order Maintenance Kits

**Stainless Steel T-Bar Handles with Handle Screw** – **Examples:** U6: V4-BAR-HANDLE-SS; U12: U12-BAR-HANDLE-SS; U16: U16-BAR-HANDLE-SS

**Aluminum T-Bar Handles with Handle Screw** – **Examples:** U6: V4-BAR-HANDLE-AL; U12: U12-BAR-HANDLE-AL; U16: U16-BAR-HANDLE-AL

**Panel Mounting Nuts** – **Examples:** U6: U6-LOCKNUT; U12: U12-LOCKNUT; U16: U16-LOCKNUT

**PTFE Packing Kits** – Consists of One PTFE Packing; One Dust Seal; Maintenance Instructions. Kit-Valve Series-T. **Example:** KIT-U12-T

**Grafoil® Packing Kits** – Consists of One Grafoil® Packing; One Dust Seal; Maintenance Instructions. Kit-Valve Series-G. **Example:** KIT-U16-G

Grafoil® is a registered trademark GrafTech International Holdings, Inc.

# VQ Series Toggle Valves

## Introduction

Parker VQ Series Toggle Valves are the right combination of performance and value for manual or pneumatic on-off control in moderate pressure and temperature applications. The manual version employs a toggle handle for quick action at pressures up to 300 psig (21 bar). Compact double acting, normally closed, and normally open pneumatically actuated versions of this valve are ideal for automatic control at pressures up to 600 psig (41 bar).

## Manual Toggle Valve Features

- ▶ Quick acting
- ▶ Inline and angle patterns
- ▶ Available with CPI™, A-LOK®, male and female NPT end connections
- ▶ Panel mountable
- ▶ Color-coded handles
- ▶ 316 stainless steel and brass body construction
- ▶ Stem seal materials –
  - Fluorocarbon Rubber
  - Nitrile Rubber
  - Ethylene Propylene Rubber
  - Highly Fluorinated Fluorocarbon Rubber
- ▶ Optional handle positioners and anti-lock handles
- ▶ 100% factory tested

## Manual Toggle Valve Specifications

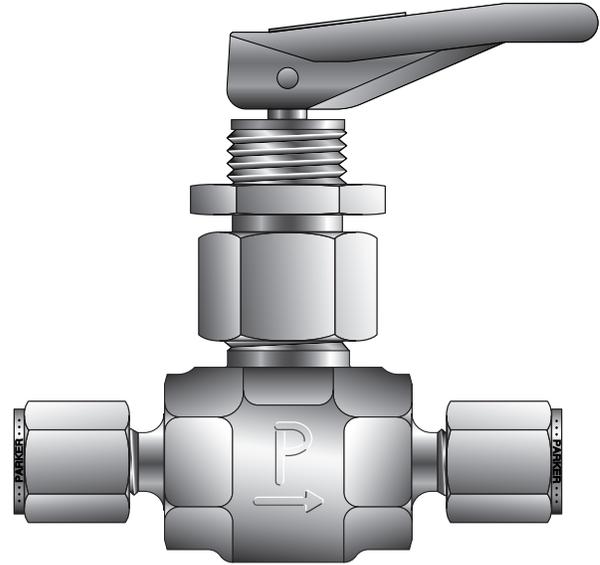

### Pressure Rating at All Temperatures:

300 psig (21 bar) CWP

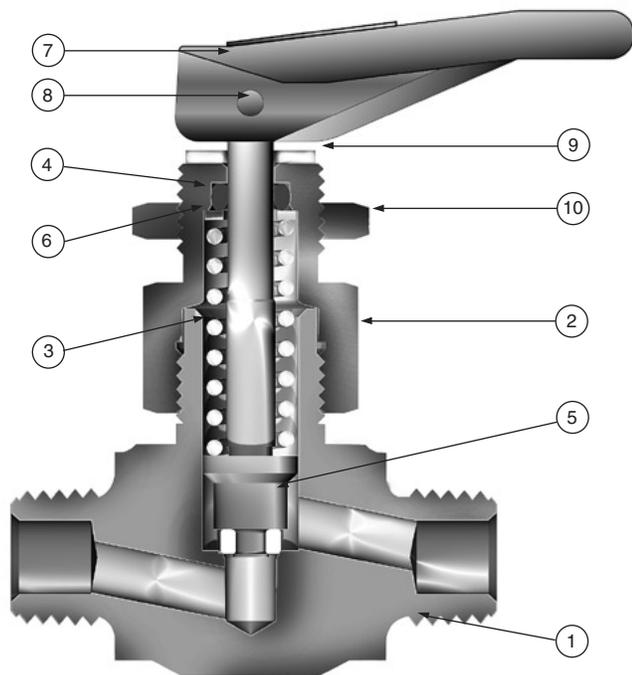

### Temperature Ratings:

PTFE Stem Tip: -20°F to 200°F (-29°C to 93°C)

PCTFE Stem Tip: -65°F to 200°F (-54°C to 93°C)

**Model Shown:  
4A-V4LQ-BP**

**Model Shown: 4M-V4LQ-SSP**

## Pneumatically Actuated Valves

## Minimum Actuating Pressures

## How to Order Actuated Valves

Dimensions in inches/millimeters are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The seven product characteristics required are coded as shown in the chart.

The example below describes a VQ4 Series pneumatically actuated (normally closed) angle pattern valve equipped with a 1/4" Male NPT inlet port, a 1/4" A-LOK® compression outlet port, PTFE stem tip, fluorocarbon rubber stem seal, brass construction with mounting bracket.

### Example 1: 4M4A-V4AQ-11AC-B

4M		4A		-		V4AQ		-		11AC		-		B											
Inlet Port*		Outlet Port*				Valve Series				Stem Seal		Actuator Type		Body Material

2A	4A	6A	M6A	V4LQ		Blank	PTFE	Blank	Fluorocarbon Rubber	11AC	Normally Closed	SS	Stainless Steel												
2F	4M	6Z	M6Z	V4AQ										K	PCTFE	BN	Nitrile Rubber	11AO	Normally Opened	B	Brass				
2M	4Z	M8A		V6LQ																		EPR	Ethylene Propylene Rubber	11AD	Double Acting
2Z	M8Z																								
4F	6A	8A	M10A	V6AQ		KZ	Highly Fluorinated Fluorocarbon Rubber																		
	6Z	8Z	M10Z																						

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## How to Order Options

**Colored Nylon Handles** – Add the designator corresponding to the correct handle color as a suffix to the part number. Black is standard, **W** - white, **B** - blue, **G** - green, **R** - red, **Y** - yellow. **Example:** M10A-V6LQ-SSP-**G**

**Anti-locking Handles** – Prevents the handle from locking in the open position. Add **-ALH** as a suffix to the part number. **Example:** 4M4F-V4LQ-BN-SSP-**ALH**

**Handle Positioner** – Aids in keeping the handle from rotating away from a desired position. To order, add the suffix **-Q4** or **-Q6** to the end of the part number. **Example:** 4M4F-V6LQ-EPR-SSP-**Q6**

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive valves cleaned and assembled for oxygen service in accordance with Parker Specification ES8003. **Example:** 4A-V4AQ-EPR-SSP-**C3**

## How to Order Maintenance Kits

**Colored Nylon Handles with Handle Pin** – Valve Series-Handle-Color. **Example:** V4Q-HANDLE-BLUE

**Handle Positioners** – Enables the user to position the handle in a desired location and prevents it from rotating. **Examples:** VQ4: VQ4-HANDLE-POSITIONER; VQ6: VQ6-HANDLE-POSITIONER

**Rubber Seal and Stem Kits** – Consists of one Stem, one Rubber O-ring Stem Seal; one Packing Washer, one Handle Pin, Maintenance Instructions, Kit-Valve Series and Stem Tip-Seal Material.

**Examples:** KIT-VQ4-BN; KIT-VQ6K-V

# NP6 Series Needle Valves

## Introduction

Parker NP6 Needle Valves are designed with packing below the stem threads and a two-piece stem. The packing below the threads protects the flow stream from thread lubricant contamination or washout and also protects the stem threads from potential damaging effects of the media. The two-piece stem produces a non-rotating lower stem for superior, repeatable sealing and reduced packing wear.

## Features

- ▶ Packing below power threads protects thread lubricants from media and isolates the media from the lubricant for severe service applications
- ▶ O-ring dust seal in bonnet protects stem threads from external contamination
- ▶ Choice of two non-rotating stem types:
  - R-Stem – All metal, blunt stem tip
  - K-Stem – PCTFE stem tip
- ▶ Non rotating lower stem extends packing and valve life
- ▶ 316 stainless steel construction
- ▶ Inline and angle patterns
- ▶ Wide variety of US Customary and SI ports
- ▶ Panel mountable
- ▶ 100% factory tested
- ▶ Optional color coded handles

## Specifications

### Pressure Rating:

6000 psig (414 bar) CWP

### Temperature Rating:

PTFE Packing:

-65°F to 450°F (-54°C to 232°C)

PCTFE:

-65°F to 350°F (-54°C to 177°C)

Nitrile Rubber:

-30°F to 250°F (-34°C to 121°C)

Ethylene Propylene Rubber:

-70°F to 275°F (-57°C to 135°C)

Fluorocarbon Rubber:

-15°F to 400°F (-26°C to 204°C)

Grafoil®:

-70°F to 700°F (-57°C to 371°C)

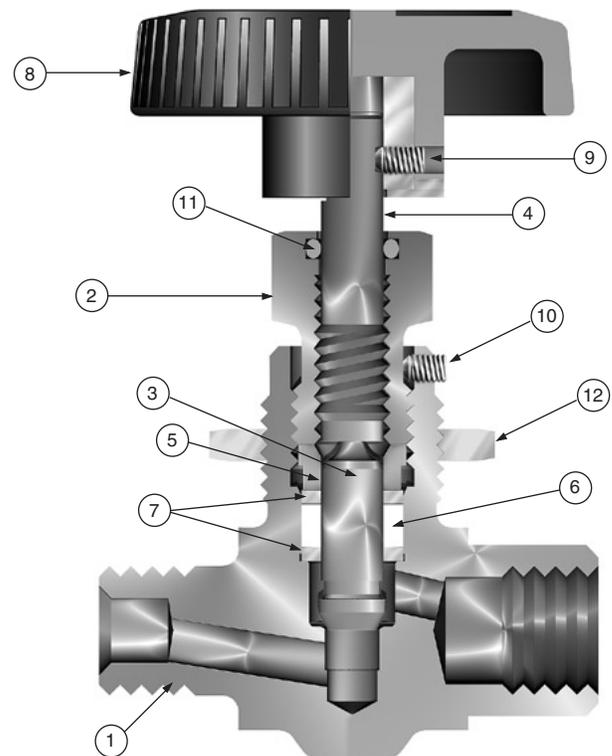

NP6

# SN6 Series Needle Valves

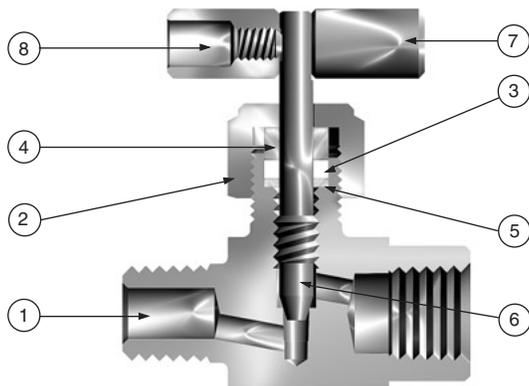

## Introduction

Parker compact SN6 Needle Valves provide shut-off and coarse regulation of liquids and gases utilized in process and instrumentation applications. These rugged valves are manufactured from stainless steel barstock and are integral bonnet designs with packing above the stem threads.

## Features

- ▶ Integral bonnet design
- ▶ 316 stainless steel construction
- ▶ Choice of two stem types:
  - R-Stem – All metal, blunt stem tip
  - K-Stem – PCTFE stem tip
- ▶ Choice of PTFE or Grafoil® packing
- ▶ Inline and angle patterns
- ▶ 100% factory tested

## Materials of Construction

**Model Shown:

# PV Series Rising Stem Plug Valves

## Introduction

Parker Rising Plug and Gauge/Root Valves are available with a variety of seat and seal materials. They are screwed bonnet designs featuring bonnet lock plates. The PV and PVG Series of valves provide a straight-through flow path in two orifice sizes. The valves utilize a non-wetted upper stem and a non-rotating lower stem in conjunction with a tapered seat for positive shut-off and long seat life, even in particulated media.

## Features

- ▶ Bi-directional flow
- ▶ Roddable, straight through flow path
- ▶ Bonnet lock plate resists accidental bonnet disengagement
- ▶ Stem dust seal helps protect stem from external contamination
- ▶ Inlet side optional outlet – PVG 1/4" Female NPT – PVG 1/2" Female NPT
- ▶ Rugged 316 stainless steel barstock construction
- ▶ Panel mounting option
- ▶ Gauge port option
- ▶ 100% factory tested

## Specifications

### Pressure Rating:

Acetal Seat (DE): 6000 psig (414 bar) CWP  
 PEEK Seat (PK): 6000 psig (414 bar) CWP  
 PCTFE Seat (K): 2200 psig (152 bar) CWP  
 PFA Seat (PFA): 750 psig (52 bar) CWP

### Temperature Rating:

#### Seats –

Acetal:  
 -20°F to 250°F (-29°C to 121°C)  
 PEEK and PFA:  
 -20°F to 400°F (-29°C to 204°C)  
 PCTFE:  
 -20°F to 200°F (-29°C to 93°C)

#### Stem Seals –

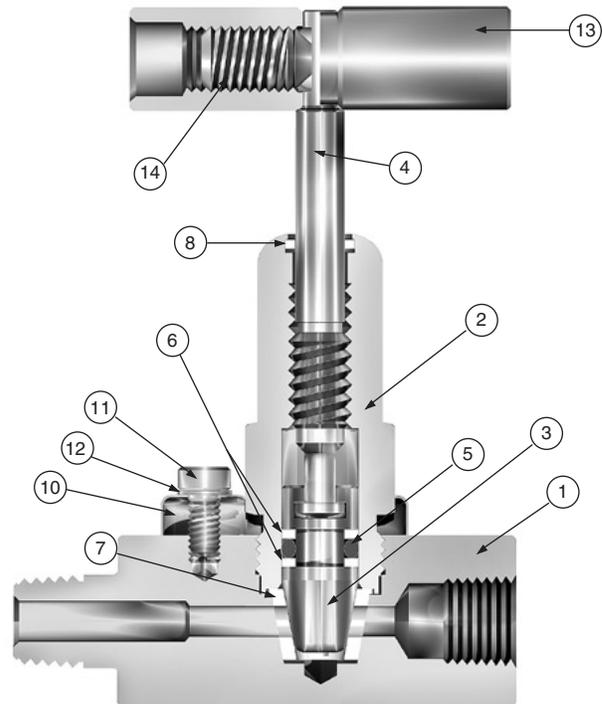

Nitrile Rubber (BN), Silicone Rubber (SI), and Ethylene Propylene Rubber (EPR):  
 -20°F to 250°F (-29°C to 121°C)  
 Fluorocarbon Rubber (V):  
 -20°F to 400°F (-29°C to 204°C)  
 Highly Fluorinated Fluorocarbon Rubber (KZ):  
 -20°F to 200°F (-29°C to 93°C)

## Flow Data

PV4:  $C_V = 0.95$ ;  $x_T = 0.43$ ; Orifice = 0.188" (4.8mm)  
 PV8:  $C_V = 2.01$ ;  $x_T = 0.33$ ; Orifice = 0.250" (6.4mm)

Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1 - P_2 / P_1 = x_T$ .

# PV Series Rising Stem Plug Valves

## Pressure vs. Temperature

## Flow Characteristics

## How to Order

Dimensions in inches/millimeters are for reference only, subject to change.

PV

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

Example 1, below, describes a PV4 Series rising stem plug valve equipped with 1/4" CPI™ compression inlet and outlet ports, a PCTFE seat, Nitrile stem seals, and stainless steel construction.

Example 2, below, describes a PVG4 Series rising stem plug valve with 1/4" gauge ports equipped with a 1/4" Male NPT inlet port and 1/4" Female NPT outlet port, an acetal seat, fluorocarbon stem seals, and stainless steel construction with panel mounting option.

**Example 1: 4Z-PV4K-BN-SS** (shown in the part number blocks below)

**Example 2: 4M-PVG4DE-V-SSP**

4Z		-		PV4		K		-		BN		-		SS	
Inlet Port*		Outlet Port*		Valve Series		Seat Type		-		Stem Seal Material		-		Body Material	
Inlet Port*		Outlet Port*		Valve Series		Seat Type		-		Stem Seal		-		Body Material	
4A	4M	6A	8M	PV4	DE	Acetal	V	Fluorocarbon	SS	Stainless Steel					
4F	4Z	6Z		PVG4	K	PCTFE		Rubber	SSP	Stainless Steel with Panel Mounting Option					
6M	8A	8Z		PV8	PK	PEEK	BN	Nitrile Rubber							
6F	8F	12M		PVG8	PFA	PFA	SI	Silicone Rubber							
							EPR	Ethylene Propylene Rubber							
							KZ	Highly Fluorinated Fluorocarbon Rubber							

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## Medium Pressure Valves

### MPN Series Valves

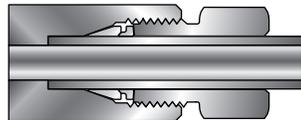

Parker MPN series valves are designed for multi-turn control of media regulation and shutoff up to 20,000 psi. Additional packing materials are available for application temperatures from -300° to +800° F. Standard critical service design features, such as the packing below the thread and the non-rotating lower stem ensure longer valve life in rugged applications.

### Medium Pressure Valve Connection Types

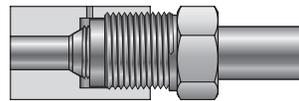

**F**  
Female NPT  
To 15,000 PSI

**MP7**  
Parker MPI™  
(Medium Pressure  
Inverted)  
To 15,000 PSI

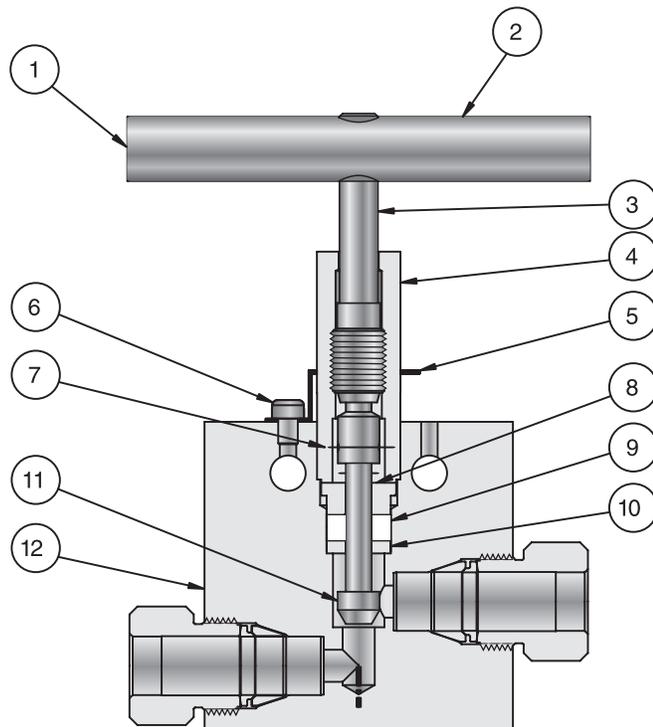

**MF**  
Cone & Thread  
(Medium Pressure  
Female)  
To 20,000 PSI

### Materials of Construction

Item #	Description	Material
1	Soc Set Screw	Steel
2	Handle	Aluminum
3	Upper Stem Assembly	17-4PH
4	Packing Gland	316SS
5	Locking Device	300 SER. SS
6	10-32 X 1/4 Fill HD SCR.	300 SER. SS
7	Stem Pin	304SS
8	Top Packing Washer	416SS
9	Packing	PTFE
10	Bottom Packing Washer	316SS
11	Lower Stem	17-4PH-H900
12	Body	316SS

# Cylinders & Accessories

## Sample Cylinders

Parker stainless steel sample cylinders provide safe containment for storage and transportation of both liquids and gases. These cylinders are DOT rated to 1800 psig (124 bar) at 70°F (21°C). Applications include hydrocarbon sampling in refineries, gas sampling in chromatography, and condensate sampling in fossil fuel and nuclear power plants.

ANSI/ASME B1.20.1 internal pipe threads are machined into both ends of each cylinder to engage external pipe connections of Parker valves, rupture disc units, or fittings.

### Stainless Steel Cylinders

Stainless steel sample cylinders are hot spun from seamless Type 316 tubing for integrity and corrosion resistance. The process provides a smooth internal flow transition through the neck to minimize pockets which can trap previous samples. Without the need for welding, the interior surface is free of any imperfections. As a result, less contamination will adhere to the interior surface when the cylinder is cleaned.

### Specifications

#### Pressure and temperature rating:

1800 psig (124 bar)  
-58°F to 450°F (-50°C to 232°C)

#### DOT-3E 1800:

75, 150, 300, and 500cc with 1/4" NPT threads

#### DOT-3A 1800:

1000 and 2250cc with 1/4" NPT threads

#### DOT-3A 1800:

3785cc (1 gallon) with 1/2" NPT threads

## Cylinder Design, Production and Testing

The design, manufacture and testing of steel sample cylinders is regulated by the US government in 49 CFR, Paragraphs 178.36 *Specification 3A; seamless steel cylinders* and 178.42 *Specification 3E; seamless steel cylinders*. Specification 3A deals with cylinders not over 1,000 pounds (455 kg) water capacity and Specification 3E is for cylinders having an outside diameter no greater than 2 inches (51 mm), with a length less than 2 feet (61 cm). Service pressure is limited to 1,800 psi (124 bar) for Parker Sample Cylinders.

The above regulations control all aspects of the design and production of sample cylinders. Material physical properties and chemical characteristics are controlled. Each cylinder must be hydrostatically tested between 3,000 and 4,500 psi (207 and 310 bar). In addition, one cylinder out of each lot of 500 or less must be subjected to a burst test and result in a safety factor on burst pressure of 3.3 minimum.

All cylinder tests must be inspected and verified by an independent inspection agency, and all test reports must be maintained for fifteen years. Each cylinder must also be marked and packaged in accordance with 49 CFR.

**Note:** DOT-3A 1800 cylinders must also be re-tested every five years at 3,000 psig (207 bar).

## How to Order / Dimensions

\* A stainless steel pipe plug is supplied for use in one end of the cylinder when a single-ended cylinder is ordered.

\*\*Includes threaded neck rings and caps. Add 6-1/4" (159mm) to each end to include cap lengths.

Dimensions in inches/millimeters are for reference only, subject to change.

# Cylinders & Accessories

## V4LC Series Miniature Needle Valves

### Features

- ▶ Stainless steel construction
- ▶ Tapered bore PTFE packing
- ▶ Optional R stem (all metal, blunt tip) or K stem (PCTFE stem tip)
- ▶ Knurled aluminum handle
- ▶ Optional stem packings

### Specifications

**Pressure Rating:** 5000 psig CWP (345 bar)

#### Temperature Rating:

##### With PTFE packings –

R stem: -65°F to 450°F (-54°C to 232°C)

K stem: -65°F to 350°F (-54°C to 177°C)

##### With Nitrile rubber packing –

-30°F to 250°F (-34°C to 121°C)

##### With Fluorocarbon rubber packings –

-15°F to 400°F (-26°C to 204°C)

##### With Ethylene propylene rubber packing –

-70°F to 275°F (-21°C to 135°C)

##### With Neoprene rubber packing –

-65°F to 250°F (-54°C to 121°C)

**Ports:** ANSI/ASME B1.20.1; 1/4" external pipe threads

**Orifice:** 0.176" (4.5mm)

### How to Order

Dimensions in inches/millimeters are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The five product characteristics required are coded as shown in the chart.

**Example 1** describes a needle valve with a K stem.

**Example 2** describes a needle valve with a R stem.

**Example 3** describes a needle valve with a K stem and optional elastomeric stem packaging of Nitrile rubber.

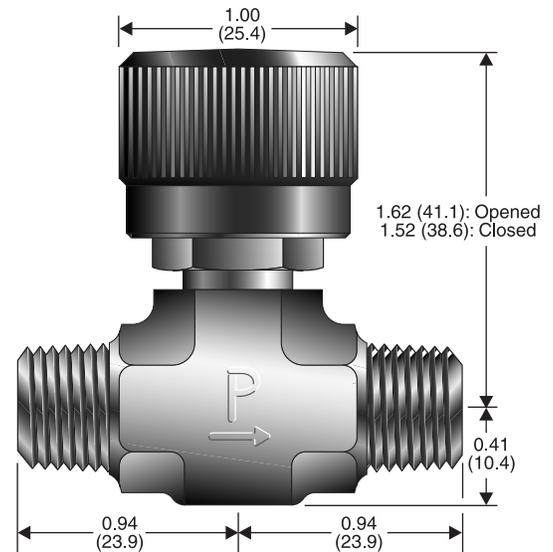

#### Examples:

**1: 4M-VL4CK-SS** (shown in the part number blocks below)

**2: 4M-VL4CR-SS**

**3: 4M-VL4CK-BN-SS**

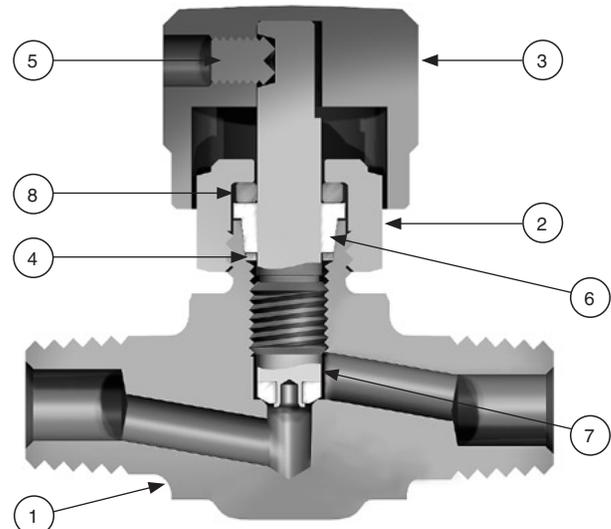

4M	-	VL4C	K	-	BN	-	SS
Inlet Port		Valve Series	Stem Type		Optional Stem*		Body Material
4M		VL4C	K PCTFE R All metal, blunt tip		V Fluorocarbon Rubber BN Nitrile Rubber EPR Ethylene Propylene Rubber NE Neoprene Rubber		SS Stainless Steel

Model Shown: 4M-V4LCK-SS

### Materials of Construction

Item #	Description	Material
1	Body	ASTM A 182 Type F316
2	Packing Nut	ASTM A 479 Type 316
3	Handle	ASTM B 211 Alloy A92024
4	Lower Packing Washer	316 Stainless Steel
5	Handle Set Screw	316 Stainless Steel
6	Packing	PTFE
7	R Stem	ASTM A 276 Type 316
7	K Stem	ASTM A 276 Type 316 with PCTFE
8	Upper Packing Washer	Commercial Brass

\* Optional elastomeric O-ring stem seals and polymer seat materials are available - See How to Order.  
Lubrication: Perfluorinated polyether

## Rupture Disc Units

### Features

- ▶ Designed for direct engagement to stainless steel sample cylinders for protection against overpressure.
- ▶ Pre-bulged 316 stainless steel rupture disc minimizes fragmentation upon burst.
- ▶ Pre-bulged disk provides close tolerance of the actual burst pressure.

### Specifications

#### Pressure Rating\*:

1800 psig at 70°F (124 bar at 21°C)

#### Temperature Rating:

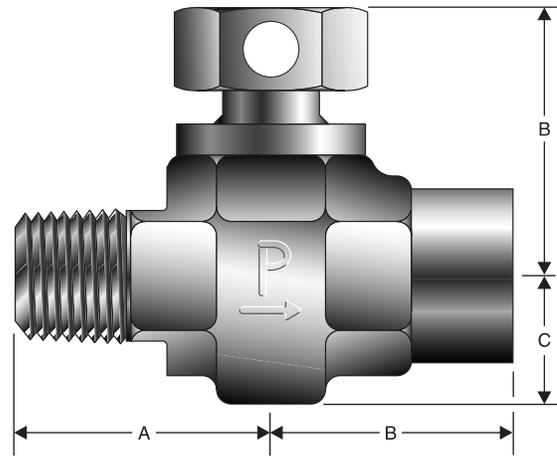

With standard PTFE gasket –

-65°F to 150°F (-54°C to 66°C)

With optional metal gasket–

-65°F to 400°F (-54°C to 204°C)

**\*Note:** Contact your Parker Distributor for availability of optional rupture disc pressures from 160 psig to 5000 psig (11 bar to 345 bar).

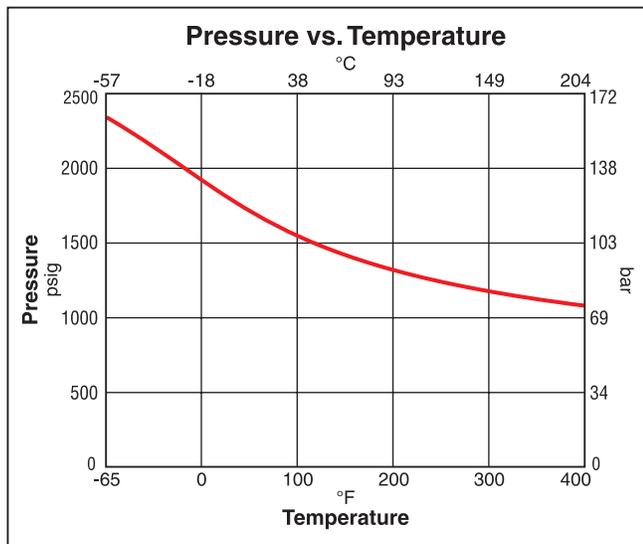

Model Shown: 4M4F-RV6L-18-SS

### Materials of Construction

Part Description	Material
Body	ASTM A 182 Type F316
Plug	ASTM A 479 Type 316
Ruptured Disk	AISI Type 316*
Gasket	PTFE or 316 Stainless Steel with PTFE Coating

**\*NOTE:** Ruptured disk material will be aluminum for pressures below 1260 psig (86 bar).

### Pressure vs. Temperature

### Precautions

1. Ensure the minimum burst pressure rating of the Rupture Disc Unit is approximately 40% higher than the cylinder service (filling) pressure.
2. Do not use Rupture Disc Units in a location where the release of the contents may cause death, personal injury and property damage. Rupture Disc Units are a CGA Type CG-1 pressure relief device and are designed to release the entire contents of the cylinder to atmosphere.
3. Follow the minimum recommended practices for maintenance and inspection of pressure relief devices in CGA Pamphlet S-1.1. Inspect the rupture disc frequently. Preferably, replace the disc yearly. Temperature and pressure cycling, and corrosive media can affect the disc's burst pressure.
4. For additional information on Parker Rupture Disc Units, refer to any of the Maintenance and Installation Instructions for Rupture Discs and Combination Needle/Rupture Discs (INI-207, INI-219, MI-107, and MI-117).

## RV6C Series Combination Rupture Disc / Needle Valves

### Features

- ▶ Combines the V4LC Series valve and the RV Series rupture disc unit into a small package
- ▶ Stainless steel construction
- ▶ Tapered bore PTFE packing
- ▶ K stem (PCTFE stem tip)
- ▶ Knurled aluminum handle
- ▶ Inline and angle patterns
- ▶ Optional stem packings

### Specifications

#### Pressure Rating:

Valve – 5000 psig CWP (345 bar)  
Rupture Disc – 1800 psig (124 bar)

#### Temperature Rating:

**With standard PTFE gasket –**  
-65°F to 150°F (-54°C to 66°C)

**With optional metal gasket and proper seal –**

-65°F to 400°F (-54°C to 204°C)

**With PTFE packing –**

-65°F to 350°F (-54°C to 177°C)

**With Nitrile rubber packing –**

-30°F to 250°F (-34°C to 121°C)

**With Fluorocarbon rubber packing –**

-15°F to 400°F (-26°C to 204°C)

**With Ethylene propylene rubber packing –**

-70°F to 275°F (-21°C to 135°C)

**With Neoprene rubber packing –**

-65°F to 250°F (-54°C to 121°C)

**Ports:** ANSI/ASME B1.20.1;

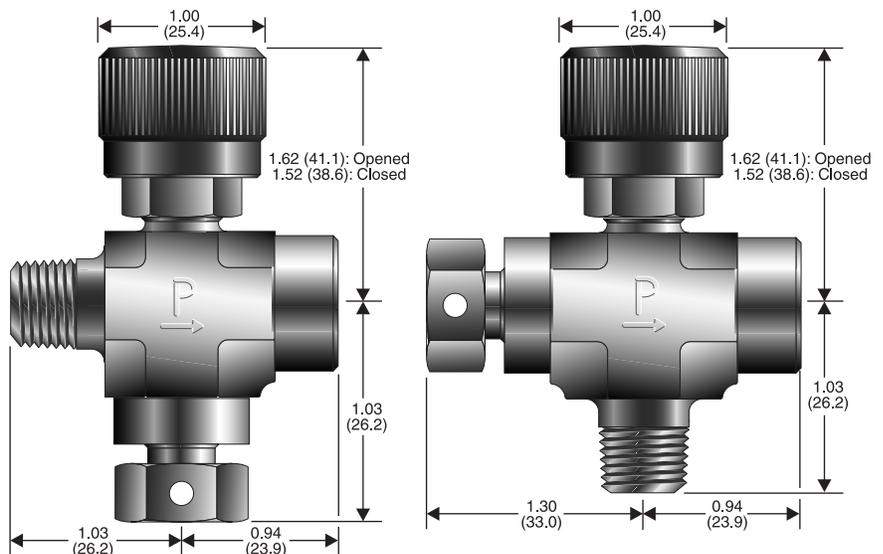

Inlet – 1/4" external pipe threads  
Outlet – 1/4" internal pipe threads

**Orifice:** 0.176" (4.5mm)

### How to Order

Dimensions in inches/millimeters are for reference only, subject to change.

Inline Pattern: 4M4F-RV6LCK-18-SS

Angle Pattern: 4M4F-RV6ACK-18-SS

### NOTES:

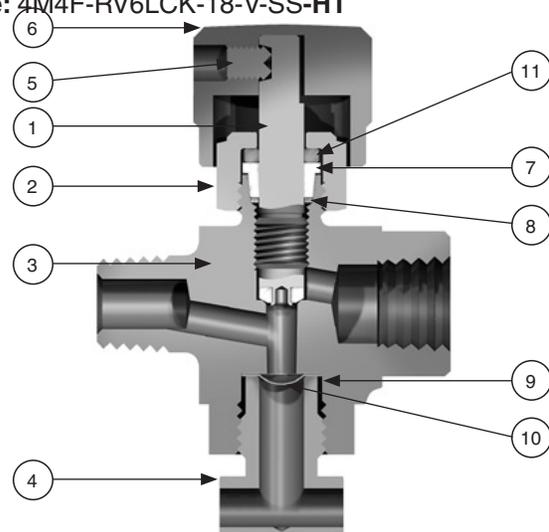

1) To obtain optional elastomeric stem packaging, insert one of the following designators prior to “-SS”:

- BN Nitrile rubber
- V Fluorocarbon rubber
- EPR Ethylene propylene rubber
- NE Neoprene rubber.

**Example:** 4M4F-RV6LCK-18-V-SS

2) To obtain the optional high temperature gasket, add the suffix **-HT** to the end of the part number.

**Example:** 4M4F-RV6LCK-18-V-SS-HT

## Dip (Outage) Tube Valves and Fittings

Parker Sample Cylinder Valves and Rupture Disc Units may be fitted with customer specified dip tubes to prevent overfilling of cylinders by providing a vapor space in sample cylinders containing liquified gases. Parker Dip Tube Fittings permit the assembly of any valve with a dip tube.

### How to Order Dip Tubes with Sample Cylinder Valves and Rupture Disc Units

A 316 stainless steel dip tube will be supplied press fit to the Male NPT port of products when specified by adding the **dip tube length** to the end of the part number. The length is measured from the end of the forging.

**Example 1:** 4M4F-RV6L-18-SS-4. Describes a Rupture Disc Unit with a four inch (102mm) long dip tube.

**Example 2:** 4M4F-RV6LCK-18-SS-2. Describes a Combination Rupture Disc / Needle Valve with a two inch (51 mm) long dip tube.

### How to Order Dip Tube Fittings

Dimensions in inches/millimeters are for reference only, subject to change.

A 316 stainless steel dip tube will be supplied press fit to the Male NPT port of Male x Female Pipe Adapters. They are available with 1/4" or 1/2" NPT threads. Specify the custom DT6L fitting by adding the **dip tube length** to the end of the part number. The length is measured from the end of the forging.

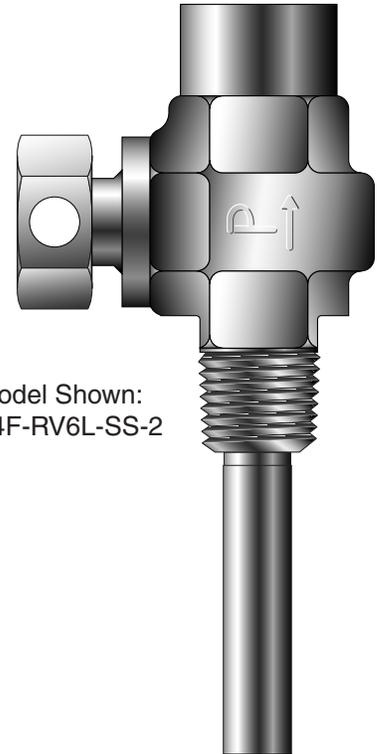

**Example 1:** 4M4F-DT6L-SS-3. Describes a 1/4" MNPT x 1/4" FNPT Fitting with a 3 inch (76 mm) long dip tube.

**Example 2:** 8M8F-DT6L-SS-2. Describes a 1/2" MNPT x 1/2" FNPT Fitting with a 2 inch (51 mm) long dip tube.

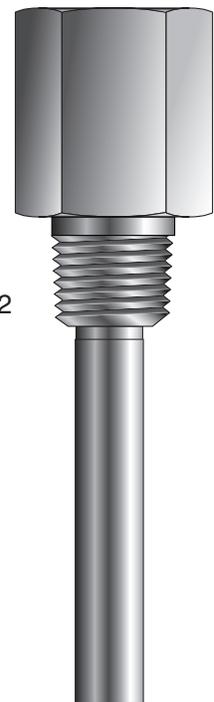

**Note:** For further information on Dip (Outage) Tubes, refer to Parker Engineering Performance Report EPR4160.2

## Offer of Sale

The items described in this document and other documents and descriptions provided by Parker Hannifin Corporation, its subsidiaries and its authorized distributors ("Seller") are hereby offered for sale at prices to be established by Seller. This offer and its acceptance by any customer ("Buyer") shall be governed by all of the following Terms and Conditions. Buyer's order for any item described in its document, when communicated to Seller verbally, or in writing, shall constitute acceptance of this offer. All goods or work described will be referred to as "Products".

**1. Terms and Conditions.** Seller's willingness to offer Products, or accept an order for Products, to or from Buyer is expressly conditioned on Buyer's assent to these Terms and Conditions and to the terms and conditions found on-line at [www.parker.com/saleterms/](http://www.parker.com/saleterms/). Seller objects to any contrary or additional term or condition of Buyer's order or any other document issued by Buyer.

**2. Price Adjustments; Payments.** Prices stated on the reverse side or preceding pages of this document are valid for 30 days. After 30 days, Seller may change prices to reflect any increase in its costs resulting from state, federal or local legislation, price increases from its suppliers, or any change in the rate, charge, or classification of any carrier. The prices stated on the reverse or preceding pages of this document do not include any sales, use, or other taxes unless so stated specifically. Unless otherwise specified by Seller, all prices are F.O.B. Seller's facility, and payment is due 30 days from the date of invoice. After 30 days, Buyer shall pay interest on any unpaid invoices at the rate of 1.5% per month or the maximum allowable rate under applicable law.

**3. Delivery Dates; Title and Risk; Shipment.** All delivery dates are approximate and Seller shall not be responsible for any damages resulting from any delay. Regardless of the manner of shipment, title to any products and risk of loss or damage shall pass to Buyer upon tender to the carrier at Seller's facility (i.e., when it's on the truck, it's yours). Unless otherwise stated, Seller may exercise its judgment in choosing the carrier and means of delivery. No deferment of shipment at Buyers' request beyond the respective dates indicated will be made except on terms that will indemnify, defend and hold Seller harmless against all loss and additional expense. Buyer shall be responsible for any additional shipping charges incurred by Seller due to Buyer's changes in shipping, product specifications or in accordance with Section 13, herein.

**4. Warranty.** Seller warrants that the Products sold hereunder shall be free from defects in material or workmanship for a period of twelve months from the date of delivery to Buyer or 2,000 hours of normal use, whichever occurs first. This warranty is made only to Buyer and does not extend to anyone to whom Products are sold after purchased from Seller. The prices charged for Seller's products are based upon the exclusive limited warranty stated above, and upon the following disclaimer: **DISCLAIMER OF WARRANTY: THIS WARRANTY COMPRISES THE SOLE AND ENTIRE WARRANTY PERTAINING TO PRODUCTS PROVIDED HEREUNDER. SELLER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS AND IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.**

**5. Claims; Commencement of Actions.** Buyer shall promptly inspect all Products upon delivery. No claims for shortages will be allowed unless reported to the Seller within 10 days of delivery. No other claims against Seller will

be allowed unless asserted in writing within 60 days after delivery or, in the case of an alleged breach of warranty, within 30 days after the date within the warranty period on which the defect is or should have been discovered by Buyer. Any action based upon breach of this agreement or upon any other claim arising out of this sale (other than an action by Seller for any amount due to Seller from Buyer) must be commenced within thirteen months from the date of tender of delivery by Seller or, for a cause of action based upon an alleged breach of warranty, within thirteen months from the date within the warranty period on which the defect is or should have been discovered by Buyer.

**6. LIMITATION OF LIABILITY.** UPON NOTIFICATION, SELLER WILL, AT ITS OPTION, REPAIR OR REPLACE A DEFECTIVE PRODUCT, OR REFUND THE PURCHASE PRICE. IN NO EVENT SHALL SELLER BE LIABLE TO BUYER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR AS THE RESULT OF, THE SALE, DELIVERY, NON-DELIVERY, SERVICING, USE OR LOSS OF USE OF THE PRODUCTS OR ANY PART THEREOF, OR FOR ANY CHARGES OR EXPENSES OF ANY NATURE INCURRED WITHOUT SELLER'S WRITTEN CONSENT, EVEN IF SELLER HAS BEEN NEGLIGENT, WHETHER IN CONTRACT, TORT OR OTHER LEGAL THEORY. IN NO EVENT SHALL SELLER'S LIABILITY UNDER ANY CLAIM MADE BY BUYER EXCEED THE PURCHASE PRICE OF THE PRODUCTS.

**7. Contingencies.** Seller shall not be liable for any default or delay in performance if caused by circumstances beyond the reasonable control of Seller.

**8. User Responsibility.** The user, through its own analysis and testing, is solely responsible for making the final selection of the system and Product and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application and follow applicable industry standards and Product information. If Seller provides Product or system options, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the Products or systems.

**9. Loss to Buyer's Property.** Any designs, tools, patterns, materials, drawings, confidential information or equipment furnished by Buyer or any other items which become Buyer's property, may be considered obsolete and may be destroyed by Seller after two consecutive years have elapsed without Buyer placing an order for the items which are manufactured using such property. Seller shall not be responsible for any loss or damage to such property while it is in Seller's possession or control.

**10. Special Tooling.** A tooling charge may be imposed for any special tooling, including without limitation, dies, fixtures, molds and patterns, acquired to manufacture Products.

# Offer of Sale

---

Such special tooling shall be and remain Seller's property notwithstanding payment of any charges by Buyer. In no event will Buyer acquire any interest in apparatus belonging to Seller which is utilized in the manufacture of the Products, even if such apparatus has been specially converted or adapted for such manufacture and notwithstanding any charges paid by Buyer. Unless otherwise agreed, Seller shall have the right to alter, discard or otherwise dispose of any special tooling or other property in its sole discretion at any time.

**11. Buyer's Obligation; Rights of Seller.** To secure payment of all sums due or otherwise, Seller shall retain a security interest in the goods delivered and this agreement shall be deemed a Security Agreement under the Uniform Commercial Code. Buyer authorizes Seller as its attorney to execute and file on Buyer's behalf all documents Seller deems necessary to perfect its security interest. Seller shall have a security interest in, and lien upon, any property of Buyer in Seller's possession as security for the payment of any amounts owed to Seller by Buyer.

**12. Improper use and Indemnity.** Buyer shall indemnify, defend, and hold Seller harmless from any claim, liability, damages, lawsuits, and costs (including attorney fees), whether for personal injury, property damage, patent, trademark or copyright infringement or any other claim, brought by or incurred by Buyer, Buyer's employees, or any other person, arising out of: (a) improper selection, improper application or other misuse of Products purchased by Buyer from Seller; (b) any act or omission, negligent or otherwise, of Buyer; (c) Seller's use of patterns, plans, drawings, or specifications furnished by Buyer to manufacture Product; or (d) Buyer's failure to comply with these terms and conditions. Seller shall not indemnify Buyer under any circumstance except as otherwise provided.

**13. Cancellations and Changes.** Orders shall not be subject to cancellation or change by Buyer for any reason, except with Seller's written consent and upon terms that will indemnify, defend and hold Seller harmless against all direct, incidental and consequential loss or damage. Seller may change product features, specifications, designs and availability with notice to Buyer.

**14. Limitation on Assignment.** Buyer may not assign its rights or obligations under this agreement without the prior written consent of Seller.

**15. Entire Agreement.** This agreement contains the entire agreement between the Buyer and Seller and constitutes the final, complete and exclusive expression of the terms of the agreement. All prior or contemporaneous written or oral agreements or negotiations with respect to the subject matter are herein merged.

**16. Waiver and Severability.** Failure to enforce any provision of this agreement will not waive that provision nor will any such failure prejudice Seller's right to enforce that provision in the future. Invalidation of any provision of this agreement by legislation or other rule of law shall not invalidate any other provision herein. The remaining provisions of this agreement will remain in full force and effect.

**17. Termination.** This agreement may be terminated by Seller for any reason and at any time by giving Buyer thirty (30) days written notice of termination. In addition, Seller may

by written notice immediately terminate this agreement for the following: (a) Buyer commits a breach of any provision of this agreement (b) the appointment of a trustee, receiver or custodian for all or any part of Buyer's property (c) the filing of a petition for relief in bankruptcy of the other Party on its own behalf, or by a third party (d) an assignment for the benefit of creditors, or (e) the dissolution or liquidation of the Buyer.

**18. Governing Law.** This agreement and the sale and delivery of all Products hereunder shall be deemed to have taken place in and shall be governed and construed in accordance with the laws of the State of Ohio, as applicable to contracts executed and wholly performed therein and without regard to conflicts of laws principles. Buyer irrevocably agrees and consents to the exclusive jurisdiction and venue of the courts of Cuyahoga County, Ohio with respect to any dispute, controversy or claim arising out of or relating to this agreement. Disputes between the parties shall not be settled by arbitration unless, after a dispute has arisen, both parties expressly agree in writing to arbitrate the dispute.

**19. Indemnity for Infringement of Intellectual Property Rights.** Seller shall have no liability for infringement of any patents, trademarks, copyrights, trade dress, trade secrets or similar rights except as provided in this Section. Seller will defend and indemnify Buyer against allegations of infringement of U.S. patents, U.S. trademarks, copyrights, trade dress and trade secrets ("Intellectual Property Rights"). Seller will defend at its expense and will pay the cost of any settlement or damages awarded in an action brought against Buyer based on an allegation that a Product sold pursuant to this Agreement infringes the Intellectual Property Rights of a third party. Seller's obligation to defend and indemnify Buyer is contingent on Buyer notifying Seller within ten (10) days after Buyer becomes aware of such allegations of infringement, and Seller having sole control over the defense of any allegations or actions including all negotiations for settlement or compromise. If a Product is subject to a claim that it infringes the Intellectual Property Rights of a third party, Seller may, at its sole expense and option, procure for Buyer the right to continue using the Product, replace or modify the Product so as to make it noninfringing, or offer to accept return of the Product and return the purchase price less a reasonable allowance for depreciation. Notwithstanding the foregoing, Seller shall have no liability for claims of infringement based on information provided by Buyer, or directed to Products delivered hereunder for which the designs are specified in whole or part by Buyer, or infringements resulting from the modification, combination or use in a system of any Product sold hereunder. The foregoing provisions of this Section shall constitute Seller's sole and exclusive liability and Buyer's sole and exclusive remedy for infringement of Intellectual Property Rights.

**20. Taxes.** Unless otherwise indicated, all prices and charges are exclusive of excise, sales, use, property, occupational or like taxes which may be imposed by any taxing authority upon the manufacture, sale or delivery of Products.

**21. Equal Opportunity Clause.** For the performance of government contracts and where dollar value of the Products exceed \$10,000, the equal employment opportunity clauses in Executive Order 11246, VEVRAA, and 41 C.F.R. §§ 60-1.4(a), 60-741.5(a), and 60-250.4, are hereby incorporated.

# Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 1-800-C-Parker.

## AEROSPACE

### Key Markets

- Aircraft engines
- Business & general aviation
- Commercial transports
- Land-based weapons systems
- Military aircraft
- Missiles & launch vehicles
- Regional transports
- Unmanned aerial vehicles

### Key Products

- Flight control systems & components
- Fluid conveyance systems
- Fluid metering delivery & atomization devices
- Fuel systems & components
- Hydraulic systems & components
- Inert nitrogen generating systems
- Pneumatic systems & components
- Wheels & brakes

## CLIMATE CONTROL

### Key Markets

- Agriculture
- Air conditioning
- Food, beverage & dairy
- Life sciences & medical
- Precision cooling
- Processing
- Transportation

### Key Products

- CO<sub>2</sub> controls
- Electronic controllers
- Filter driers
- Hand shut-off valves
- Hose & fittings
- Pressure regulating valves
- Refrigerant distributors
- Safety relief valves
- Solenoid valves
- Thermostatic expansion valves

## ELECTROMECHANICAL

### Key Markets

- Aerospace
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Paper machinery
- Plastics machinery & converting
- Primary metals
- Semiconductor & electronics
- Textile
- Wire & cable

### Key Products

- AC/DC drives & systems
- Electric actuators, gantry robots & slides
- Electrohydraulic actuation systems
- Electromechanical actuation systems
- Human machine interface
- Linear motors
- Stepper motors, servo motors, drives & controls
- Structural extrusions

## FILTRATION

### Key Markets

- Food & beverage
- Industrial machinery
- Life sciences
- Marine
- Mobile equipment
- Oil & gas
- Power generation
- Process
- Transportation

### Key Products

- Analytical gas generators
- Compressed air & gas filters
- Condition monitoring
- Engine air, fuel & oil filtration & systems
- Hydraulic, lubrication & coolant filters
- Process, chemical, water & microfiltration filters
- Nitrogen, hydrogen & zero air generators

## FLUID & GAS HANDLING

### Key Markets

- Aerospace
- Agriculture
- Bulk chemical handling
- Construction machinery
- Food & beverage
- Fuel & gas delivery
- Industrial machinery
- Mobile
- Oil & gas
- Transportation
- Welding

### Key Products

- Brass fittings & valves
- Diagnostic equipment
- Fluid conveyance systems
- Industrial hose
- PTFE & PFA hose, tubing & plastic fittings
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

## HYDRAULICS

### Key Markets

- Aerospace
- Aerial lift
- Agriculture
- Construction machinery
- Forestry
- Industrial machinery
- Mining
- Oil & gas
- Power generation & energy
- Truck hydraulics

### Key Products

- Diagnostic equipment
- Hydraulic cylinders & accumulators
- Hydraulic motors & pumps
- Hydraulic systems
- Hydraulic valves & controls
- Power take-offs
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

## PNEUMATICS

### Key Markets

- Aerospace
- Conveyor & material handling
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Transportation & automotive

### Key Products

- Air preparation
- Brass fittings & valves
- Manifolds
- Pneumatic accessories
- Pneumatic actuators & grippers
- Pneumatic valves & controls
- Quick disconnects
- Rotary actuators
- Rubber & thermoplastic hose & couplings
- Structural extrusions
- Thermoplastic tubing & fittings
- Vacuum generators, cups & sensors

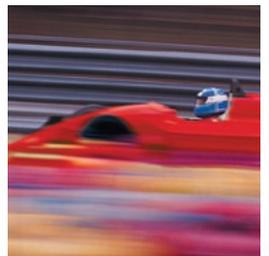

## PROCESS CONTROL

### Key Markets

- Chemical & refining
- Food, beverage & dairy
- Medical & dental
- Microelectronics
- Oil & gas
- Power generation

### Key Products

- Analytical sample conditioning products & systems
- Fluoropolymer chemical delivery fittings, valves & pumps
- High purity gas delivery fittings, valves & regulators
- Instrumentation fittings, valves & regulators
- Medium pressure fittings & valves
- Process control manifolds

## SEALING & SHIELDING

### Key Markets

- Aerospace
- Chemical processing
- Consumer
- Energy, oil & gas
- Fluid power
- General industrial
- Information technology
- Life sciences
- Military
- Semiconductor
- Telecommunications
- Transportation

### Key Products

- Dynamic seals
- Elastomeric o-rings
- EMI shielding
- Extruded & precision-cut, fabricated elastomeric seals
- Homogeneous & inserted elastomeric shapes
- High temperature metal seals
- Metal & plastic retained composite seals
- Thermal management

ENGINEERING YOUR SUCCESS.
